Digital Literacy Awareness Quiz

* Indicates required question

What does HTTPS in a website URL indicate? 0 points

- ◯ The site is fast
- ◯ The connection is secure and encrypted
- ◯ The site is free
- ◯ The site is government-owned

Name two platforms where a college student can build a professional online presence.

Your answer

Which of the following is a sign of a phishing email? * 0 points

- ◯ It comes from a known contact
- ◯ It has correct grammar and spelling
- ◯ It asks you to click a link and enter your password urgently
- ◯ It includes your college logo

What does the term "Digital Literacy" mean? * 0 points

- ◯ Knowing how to type fast
- ◯ Using social media daily

- ◯ The ability to use, evaluate, and create information using digital tools
- ◯ Having a smartphone

REFLECTION :

For Part A, I used GEEKSFOR GEEKS as my coding practice platform. I completed the beginner's challenge in the Problemset , which introduced me to the structure of competitive programming problems — reading input, processing logic, and producing output. Although the problem itself was simple (summing two numbers), the real learning was understanding how codeforces interface works, how to read problem statements, and how to submit a solution. This experience gave me confidence to attempt harder problems in the future.

For Part B, I created a 5-question Digital Literacy Awareness Quiz using Google Forms. I included multiple choice questions on phishing, HTTPS, and digital literacy definitions, along with a short answer question on professional platforms. Building the form taught me how Google Forms integrates seamlessly with Google Sheets for response collection — a powerful tool for surveys, quizzes, and data collection in academic projects.

Both tools will be directly useful in my academic career: codeforces for practicing coding before internship interviews, and Google Workspace for collaborating on group projects and collecting peer feedback efficiently.
